

Boost your sales with the most innovative and durable portable counter & podium display solution

The assembly process of the duo.hello is reduced to the minimum. All the customer has to do is to set up the wrap, insert the inside shelf, add the counter top and the pole. It is easy--very easy--no tools or parts are needed.

The duo.hello roll technology is unique because it is manufactured from an extruded PVC material bringing flexibility as well as extreme rigidity. As a result, one is able to showcase heavy products on the top counter.

The duo.hello is a **counter & podium solution** providing one of the best marketing tools offered today. The duo.hello is an excellent tool in various sales, promotions, demonstrations, tradeshow, traffic stoppers and sampling projects. The duo.hello is a great attraction that will entice any customer to any type of product. It also provides space for storing product leaflets or other marketing tools.

The duo.hello comes in a standard size with several available configurations; including a **3-part telescopic pole**. The duo.hello comes with two bags: one **cardboard tube with nylon bag** for the duo.hello PVC roll and one **padded nylon bag** for the counter and tighteners.

1. The exclusive duo.hello technology is flexible enabling the PVC roll to be stored in a very compact way. The telescopic pole carries front and/or back graphics according to customers needs.
2. The connection slider grips at the edges of the duo.hello PVC roll to insure a solid connection. The aluminium connection slider is easy to slip into the roll. Edges will easily connect.
3. The lower insert enables to adjust the tension on the roll according to the selected shape. Place it upside down on the floor and roll the wrap around it.
4. The upper counter is fitted on the top to set-up the display. As a result, the lid can be used as storage space for papers and little objects.
4. Once the counter is set-up, the telescopic pole can be inserted in the existing holes. This will offer two directions for the graphics according to the designers needs.

The duo.hello kit includes for all the height versions (300 mm, 600 mm and 900 mm):

- ▶ One PVC duo.hello roll panel
- ▶ One aluminium connection slider
- ▶ One top counter
- ▶ One interior low tightener
- ▶ One 3-part telescopic pole - maximum height over the counter: 1,600 mm (also available without pole)
- ▶ One set of hanger and kicker
- ▶ Two bags: one cardboard tube with nylon bag for the duo.hello PVC roll and one padded transport bag for the counter and tighteners.
