

Ceiling suspensions

Suspending graphics has often been a challenge...

AFIX frames make it easy!

AFIX connectors allow create geometric shapes in only minutes.

The lightweight construction of **AFIX** frames makes suspending your graphics a safe and eye catching display.

With our unique suspension system, hanging your **AFIX** frame is a joy, not a chore.

There has never been a framing system as versatile or eye appealing as **AFIX** frames.

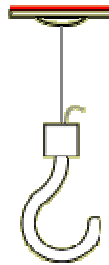

Suspended displays & fixtures

1. Ceiling mount with self adhesive stickers

- **Function:** Suspend your displays on any wall or ceiling with our self adhesive fixture kits.
- **Available with profile(s):** Square, round, rectangular
- **Tips:** Clean surface thoroughly. Stick the square adhesive. Place display on hooks and then adjust length of nylon strings ensuring hooks are level.

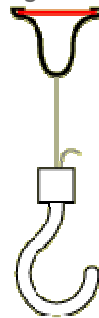

2. Cascading attachments

- **Function:** Superimpose multiple suspended displays
- **Available with profile(s):** Square, round, rectangular
- **Tips:** Before installing, prepare the hooks according to the length of the nylon strings. Start with higher display first. Add other displays and hooks as shown on left. Use a levelling tool.

3. Mounted on suspended ceilings

- **Function:** An ingenious clip with simple adjustments to mount your displays on most ceiling rails.
- **Available with profile(s):** Square, round, rectangular
- **Tips:** Once the frame is assembled, place a suction cup in each corner with help from the plastic pins. Place the display on your window (making sure it is clean and dry). Use a levelling tool.

Double-sided displays

Reminder: The AFIX system allows you to hang posters printed on both sides. At no extra cost, you can display your designs front and back or even display two posters back to back.
