

duo.Xpressions

Image carrier

To catch the eye • to hold the attention • to enhance the effect • to tease the curiosity
► Let the graphic speak for itself and convey the message

Boost your sales with the most creative display solution!

A creative visual impact in just a few steps.

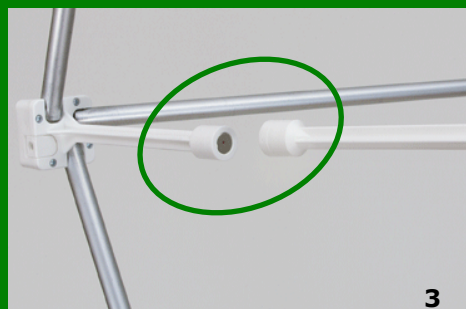

Duo.Xpressions offers endless possibilities of configurations thanks to 6 different shapes of frame and the possibility to attach graphics of all sizes on two levels of depth.

Nothing will restrict your imagination. Display your image and message differently and maximize their impact!

To top it all, the duo.Xpressions frame is user-friendly: a very light self-locking frame on which graphics can be changed within seconds.

duo.Xpressions has been developed in partnership with Optima Graphics USA who invented the Xpressions concept : selection of the tension fabric, creation of 100 different configurations, new printing method X-Factor (tension on all four corners for a movement effect, focus area in the center) and dye-sub printing. Therefore, to benefit from all the Xpressions potential, Duo Display recommends working with Optima Graphics.

1. The duo.Xpressions is a self-locking frame that pops up in seconds without connectors. Grasp the center hub and lift the frame open to shoulder height. Adjust the tension connectors to lock the duo.Xpressions frame into position.
2. The duo.Xpressions with the attached fabric fits in a compact bag or rotomoulded case.
3. The duo.Xpressions uses strong inside magnetic connectors that will lock the frame automatically within seconds.
4. All in one solution, the fabric skins are withheld on the frame thanks to studs that enable to attach the graphics on two levels: on the front or at the back of the frame. Now insert the O-rings, which maintain the graphics and prevent them from twisting when folded.
5. The duo.Xpressions features adjustable feet in case of uneven floor. The duo.Xpressions expandable tube frame is made of high-grade aircraft aluminum alloy tubing with a unique weight-to-strength ratio for long-term durability.

YOU DESERVE THE ORIGINAL !

Double effect: 3D and movement – the most creative solution!

With duo.Xpressions, innovation brings the creativity and efficiency of your message at its best:

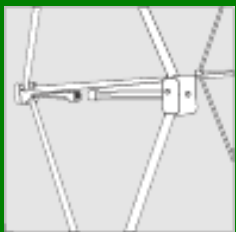

3D effect: create depth by withholding the graphics on the front or at the back of the frame.

Movement effect: give dynamism to your message thanks to the tension of the fabric skins (distortion on all four corners and focus area in the center).

duo.Xpressions is a portable visual solution that enhances your creativity and difference!

It is not a luxury to count on THE ORIGINAL duo.Xpressions

Stabilizing feet

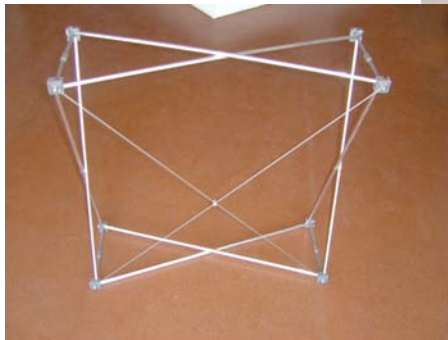

duo.snap

Boost your sales with the most ergonomic display solution!

A creative visual impact in just a few steps.

Imagine a counter unit you can carry in a very small lightweight bag. A counter unit you can set up within seconds!

Based on the same technology as duo.Xpressions, the duo.snap – the most user friendly counter on earth - will go along everywhere with you to maximise your visual impact!

Lightweight transport bag

Foldable Shelf

Iron cable for stability

Easy set-up

Endcaps available

1. The duo.snap is a light weight display solution which pops up in 5 seconds.
2. The duo.snap has a foldable shelf which allows using the smallest transport bag for a counter.
3. For more stability, the duo.snap features 2 iron cables attached on the stud and tied with a node.
4. All in one solution, the fabric skins are withheld on the frame thanks to studs that allow attaching the graphics. Now insert the O-rings, which maintain the graphics and prevent them from twisting when folded.
5. The fabric skins can feature endcaps that will be attached on the back of the frame.
6. As an option, a lower shelf can be added to create a storage unit.
